**EVIDENCE:GA2-240202501-AA2-EV02: PRESENTATION**

**La Piedra del Peñol is a 220 meters high monolith located between the municipalities of Guatapé and El Peñol, in the eastern subregion of the department of Antioquia, with 702 steps to the top, at a distance of 2 hours and 2 minutes (83.4 km) by Medellín-Bogotá Highway.**

**It is a beautiful place, its main attraction is that from its peak you can appreciate a magnificent panoramic view of the Guatapé dam and the surrounding mountains.**

**I recommend you to come to La Piedra del Peñol, it is more beautiful and romantic than Melgar itself.**

**In this place I can climb multiple sensations, therefore, it has become my favorite place, I feel very happy, renewed, I forget my worries, I have been able to overcome the worst of my fears, such as heights and to face it.**

**I chose this place because of its wonderful climate, its stupendous view, it allows me to enjoy a family atmosphere, breathe fresh air, interact with nature, enjoy green landscapes, perform various recreational activities.**

¡Gracias!
